### **DETAILED ACTION**

Claims 7-18 are pending in the application. Claims 7, 11, and 15 are independent claims. Claims 1-6 are cancelled.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hall et al. (US 20030208493).

As per claims 7, 11, and 15, Hall et al. teach:

A method for managing data in a source file of the type from which data may be extracted for use in an application wherein the source file data is described by an

extensible markup language – pars. 0013, 0046, 0093, 0223.

structuring the data in the form of objects – pars. 0046, 0128, 0232.

wherein components of the objects can be stored in first files, wherein the components each represent a logical unit of an object – pars. 0031, 0036, 0225.

providing a second file having a first mechanism for referencing the components as a higher-order, object-based logical level for storing and selectively directly accessing the objects – pars. 10, 52, 55, 0068, 0102, figs. 1-2.

the foregoing providing hierarchical structuring of object complexes and distribution of data of objects among a plurality of files to enable a reading-in tool to pass over or avoid having to read or process portions of the source file data when seeking other portions of the source file data for use in the application – pars. 32-33, 53-55.

As per claims 8, 12, and 16, Hall et al. teach:

wherein the components are themselves objects – pars. 0010, 0045-0046, 0064-0068.

As per claims 9, 13, and 17, Hall et al. teach:

wherein the components are stored in object-specific generic containers, and wherein the containers are provided for referencing the respective object – pars. 0043, 0064, 0068, 0102, figs. 1-2.

As per claims 10, 14, and 18, Hall et al. teach:

wherein the extensible markup language is XML – par. 0223.

### ***Response to Arguments***

Applicant's arguments filed 11/2/07 have been fully considered but they are not persuasive. Regarding new limitations in claims 7, 11, and 15, please see the new rejection above.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
